

## MAC101 QUIZ NO 1

1. Convert from base 16 to base 8 without converting to base 10!

FEAC(16)  $\rightarrow$  X(8)

2. Write a C++ program that lets the user enter two numbers.

- a. If for example the user enter both numbers equal to 50:

The program will display "50 is indeed the same as 50."

- b. If the user for example enters 50 and 70 the program will display

"50 is not the same as 70 please try again"

GOOD LUCK!
