

## MAC101 Quiz NO. 5

Write a C++ program that lets the user enter the number of courses in computer science (from 1-7) he wishes to take.

The program will then list the recommended courses to the user.

Use array to implement the program. See examples below.

1. If the user enters 7

```
Enter how many CS courses you wish to take (1-7)--> 7
We recommended to take the following courses:
1 CSF101
2 MAC281
3 MAC101
4 MAC125
5 MAC283
6 MAC230
7 MAC284
```

2. If the user enters 9

```
Enter how many CS courses you wish to take (1-7)--> 9
The number should be from 1 - 7 only
```

2. If the user enters 4

```
Enter how many CS courses you wish to take (1-7)--> 4
We recommended to take the following courses:
1 CSF101
2 MAC281
3 MAC101
4 MAC125
```

For full credit you can only use the commands we have studied in class.

Please send your program listing + the output display image to: [prof@dpeled.com](mailto:prof@dpeled.com)

Make sure that I verify receiving your work before leaving the session.

## GOOD LUCK!
