

MAC101 Quiz NO. 9

Edit the program we did in class [here](#) to make the output display in multiple bases descending from the base entered to base 2. (See below).

```
Enter any Decimal Number: 255
Enter Target Base 16
255(10) in all descending bases -->FF(16)120(15)143(14)168(13)193(12)212(11)255(10)313(9)377(8)513(7)1103(6)2010(5)3333(4)100110(3)1111111(2)
```

If you submit your work by the end of the class of today, you will received 5 bonus points credit toward your final grade. Otherwise, for regular quiz credit please submit your work to prof@dpleld.com by Monday before the start of our next class.

GOOD LUCK!
