

Installing Windows on MAC using Boot Camp (plus Tina Installation)

By Tamara Pando

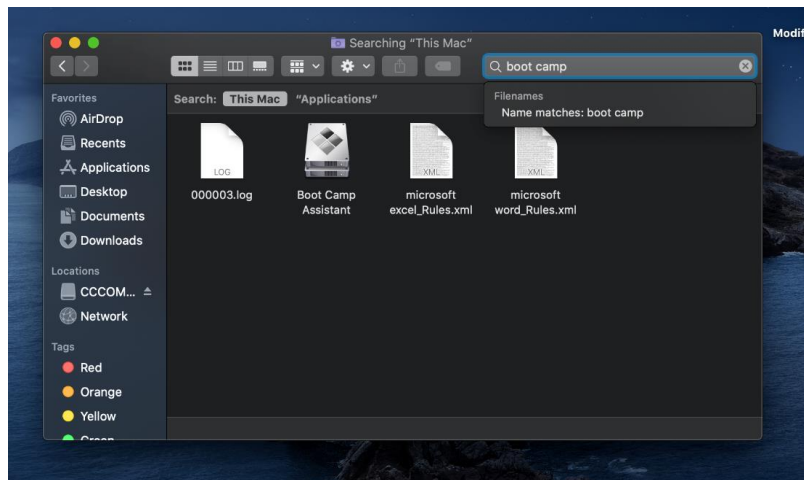

1. Download Windows Operating System ISO from the Microsoft site: <https://www.microsoft.com/en-us/software-download/> (at the moment, this link is having trouble loading, after a few minutes will load).

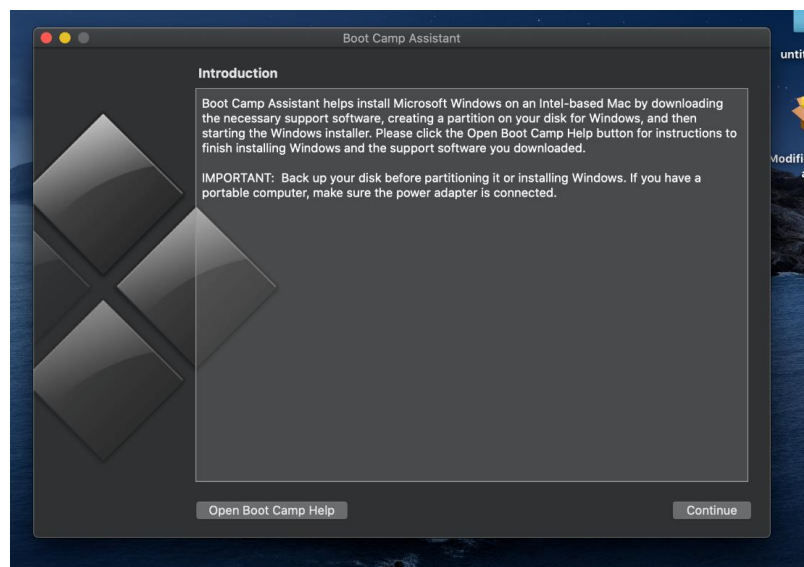

Click “Save File” and OK. This process will take a while.

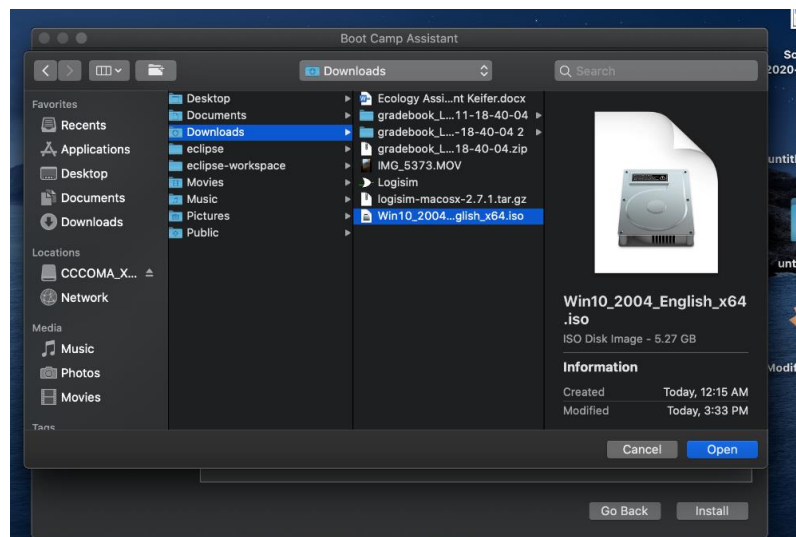

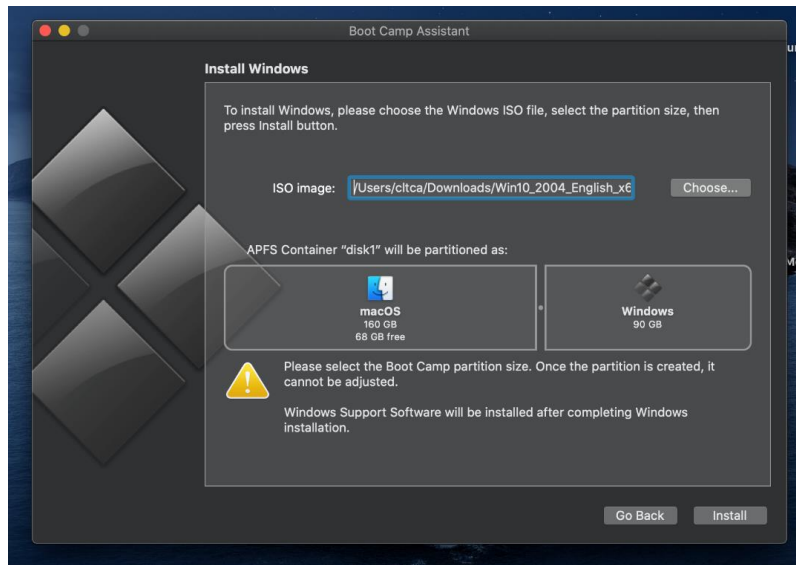

2. After the ISO is downloaded, go to applications and search for “boot camp”

Open boot camp and follow the instructions

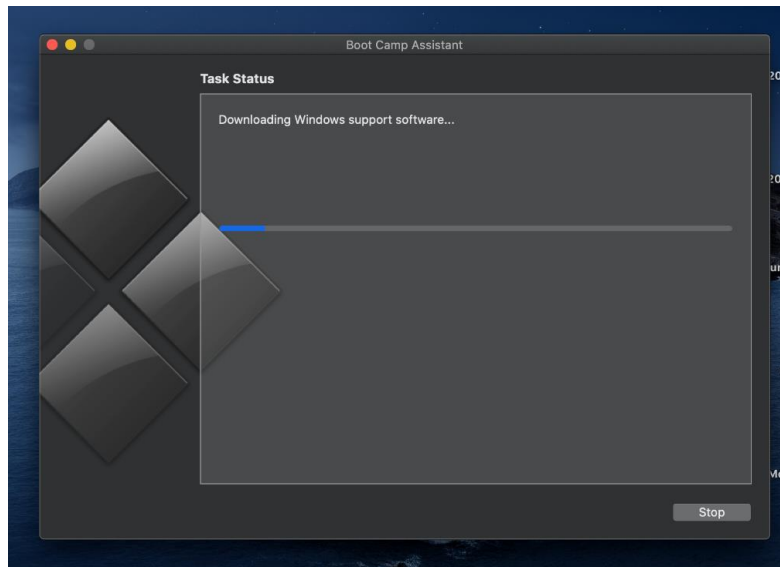

Click continue

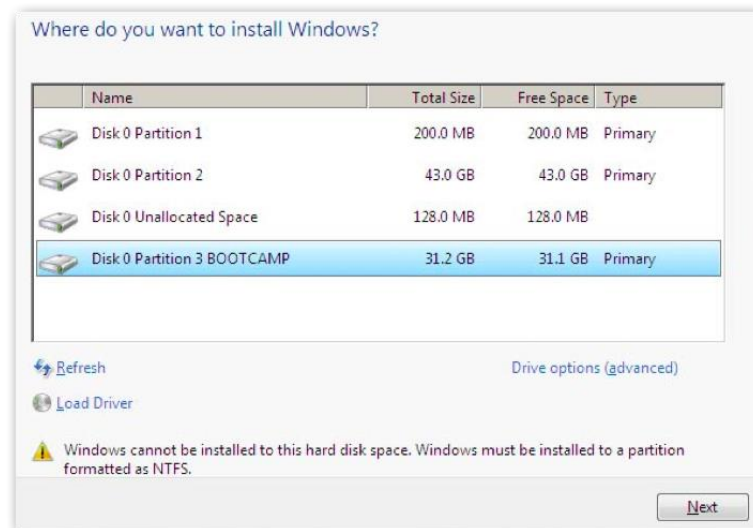

ISO image, go to your downloads and choose the Windows 10 ISO

Choose Disk partition. You can choose any size, if Windows will be use for just a few software you can use less than 100 GB of space. Click "install"

Boot Camp is processing the partition. This will take a while.

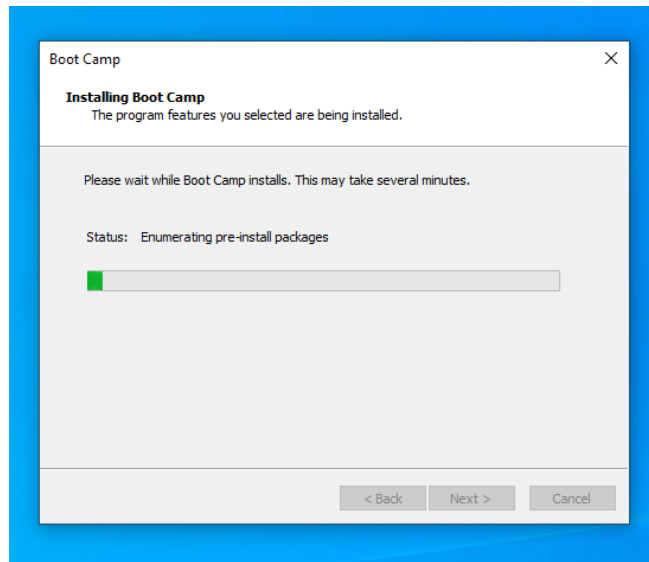

- Once boot camp is installed, it will automatically go to the Windows installation. Follow the dialog boxes and Windows 10 will appear ready for installation.

Choose boot camp for Windows installation

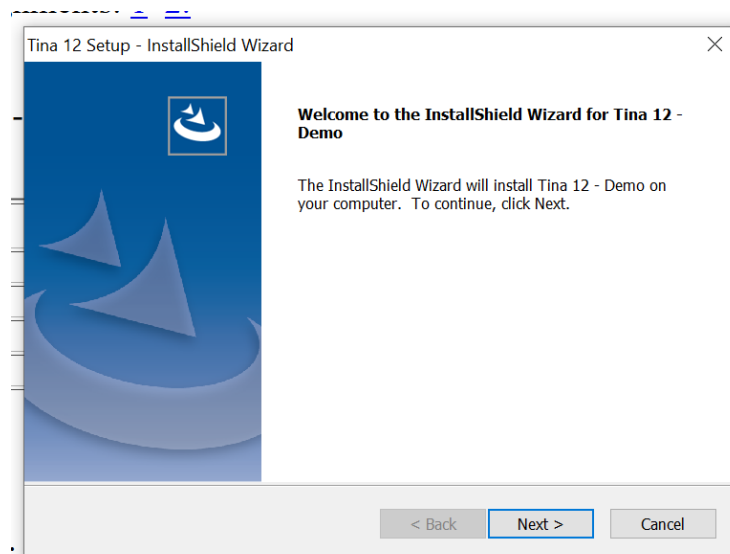

Click "Next" and install Windows normally. It will take a few minutes.

- Once Windows is installed, the Boot Camp Window will appear. Follow the instructions and finish the installation.

After this step, Windows will ask to restart. This will complete the installation.

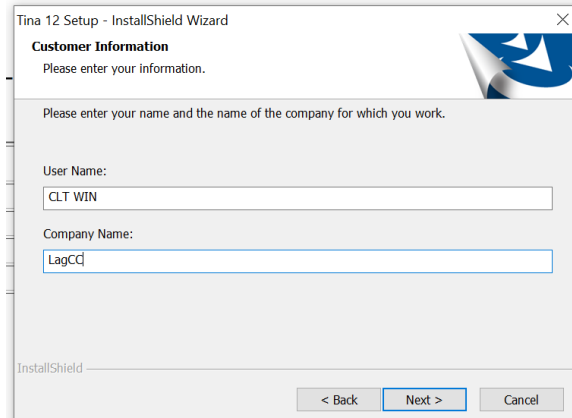

5. Installing Tina: go to dpeled.com and click on Tina Demo. Click on the exe file and the installation wizard will appear.

indicate in the subject your name (Last, First) and your c

Follow the instructions for installatio

cate in the subject your name (Last, First) and your cla:

After this Tina is installed on Windows

gments: [1](#) [2](#).

NOTE: ONCE YOU HAVE BOTH OS INSTALLED, WINDOWS WILL BE THE DEFAULT OS. TO CHOOSE THE OS, TURN ON YOUR COMPUTER AND AS SOON AS YOU HEAR THE 'ON' SOUND, YOU MUST KEEP THE "OPTIONS" KEY PRESSED. THIS WILL GIVE YOU ACCESS TO ALL OPERATING SYSTEMS.

You will see a partition with Windows on your computer.
